WE BELIEVE IN ANOTHER WAY
TO DRIVE. TO FEEL THE ROAD
WITHOUT TAKING A SINGLE CURVE
FOR GRANTED. TO VALUE EVERY
SINGLE DETAIL. FROM THE WHEEL
RIMS TO THE REAR COAST TO COAST
LIGHTS. WE BELIEVE IN THOSE WHO
ASK IF A BUCKET SEAT IS REALLY
NECESSARY, OR IF 310 HORSES IS
TOO MUCH. BECAUSE THE NEW
CUPRA FORMENTOR IS NOT FOR
THOSE WHO NEVER QUESTION.
BUT FOR THOSE WHO DO, AND
STILL DECIDE TO GO AHEAD.

ANOTHER WAY TO OBSERVE

BEAUTY. YOU CAN ARGUE ABOUT IT, OR YOU CAN ENJOY IT. BECOME ANGRY WHEN OTHERS CANNOT SEE THE SAME BEAUTY THAT YOU DO, OR UNDERSTAND THAT IT IS PRECISELY THE SUBJECTIVENESS OF BEAUTY THAT MAKES IT ETERNAL. ONE PERSON, ONE BEAUTY. UNTIL THE END OF TIME. THIS OTHER BEAUTY, WITHOUT LIMITS OR RESTRICTIONS, HAS LITTLE TO DO WITH THE OBJECT BEING OBSERVED, AND EVERYTHING TO DO WITH THE EYES THAT LOOK UPON IT.

ISN'T THAT BEAUTIFUL?

CUPRA FORMENTOR

ANOTHER WAY TO MOVE

YOU GO RUSHING THROUGH LIFE. YOU WANT EVERYTHING IMMEDIATELY, AND HATE TO WAIT. BUT MAKE NO MISTAKE. HASTE HAS LITTLE TO DO WITH SPEED. HASTE IS YOUR ENEMY. IT MAKES YOU ARRIVE WITHOUT ENJOYING THE JOURNEY. SPEED, CONTRARY TO WHAT MANY PEOPLE THINK, IS NOT ABOUT WHO ARRIVES FIRST. IN FACT, IT'S NOT EVEN ABOUT ARRIVING. IT'S ABOUT MOVING SO FAST THAT YOU CANNOT PERCEIVE A DIFFERENCE BETWEEN THE ROAD AND YOURSELF. CHOOSING THE LONG WAY. KNOWING THERE IS ANOTHER WAY TO DO THINGS. TO STOP ASKING: "DO I REALLY NEED THIS POWER?", AND START ANSWERING:

"I'LL FIND OUT WHEN I ACCELERATE".

ENVIRONMENTAL INFORMATION

AIR QUALITY

Diesel engines incorporate an optimised exhaust gas treatment, the Selective Catalytic Reduction system (SCR), with AdBlue® twin dosing to further minimize nitrogen oxide emissions.

LIGHTS

Headlamps and rear lamps are 100% LED, reducing significantly power consumption and increasing life and effectiveness of the lights.

RENEWABLE AND RECYCLED MATERIALS

Use of renewable materials (cotton, natural rubber and cellulose) and recycled materials (plastics) in various parts of the vehicle.

TYRES

Low rolling resistance tyres reduce the rolling resistance coefficient.

BRAKES

Incorporation of RBO technology (which reduces the residual brake torque between the brake pad and disc), permits an emissions reduction of up to 1g CO₂/100km.

AERODYNAMICS

Improved vehicle aerodynamics, thanks to optimised design of the bodywork, wheels and cooling system.

Move to ZERO, CUPRA's environmental mission
Climate Change. Resources. Air Quality. Environmental compliance.

BODYWORK

Use of ultra-high strength steel, which together with hot stamping technology, permits a reduction in thicknesses and weight without loss of performance.

ACOUSTICS

All versions incorporate a double-seal system on the doors, which reduces noise levels and enhances comfort.

SEATS

The use of new PUR foam formulations reduces the emission of volatile organic compounds (VOCs) in the cabin interior by up to 50%.

ENGINES

e-HYBRID: The all-electric motor in the e-HYBRID engine enables zero emission driving in electric mode.

Diesel: Some 2.0l Diesel engines allow the use of R100 fuel. R100 is made from 100% renewable raw material (Hydrotreated Vegetable Oil, HVO), achieving a reduction of up to 90% in CO₂ emissions during its production, compared to a conventional fuel.

CIRCULAR ECONOMY

We are advancing several initiatives and actions regarding circular economy in our processes to be more efficient, minimise our waste and reduce the environmental impact of our supply chain.

MANUFACTURING PROCESS

During the period from 2010 to 2021 we reduced the CO₂ emissions per manufactured car by 61%, whilst also cutting the energy demand per car by 17%. Additionally, we've achieved a 29% saving in water consumption and a 75% reduction in waste generated per car.

Sludge generated in our Paint Shop is recovered and reused as base material for the construction of paved roads, helping us to reduce the amount of waste generated in our productive processes and the use of raw material in their construction.

E-RANGE MONITOR

Informs the driver of the increase in range of electric-only engine when combustion-only is off.

ZERO EMISSIONS

An indicator that shows the distance driver with zero emissions using electric-only mode.

INTELLIGENT HYBRID

A function that helps the driver to conserve and optimise electrical power based on the planned route.

* The accurate range for your vehicle will vary according to a number of different factors which include the route, weather conditions, vehicle load (occupants + luggage), battery age and condition, optional equipment (alloys, tyres, etc.), the use of peripheral energy consumption systems such as heating, air conditioning and heated seats, as well as your driving style.

The indicated range has been calculated in compliance with WLTP standards, which set out test conditions applicable to all car manufacturers to ensure the comparability of these tests for all vehicles.
